## WHERE TO BUY

### HARDWOOD PLYWOOD, VENEER, & ENGINEERED HARDWOOD FLOORING

---

**Decorative Hardwoods Association  
Membership Directory**

**[www.decorativehardwoods.org](http://www.decorativehardwoods.org)**

Formerly the Hardwood Plywood & Veneer Association®

Right product. Right size.

Right location. Right company.

PENROD currently stocks a large variety of core veneer products at multiple port locations in North America. In fact, PENROD goes to places in the world other companies don't go to for the materials that fulfill the needs of manufacturers.

PENROD OFFERS:

- Core Veneer
- Various Types of Platforms
- Rotary and Sliced Faces

PENROD SOURCES PRODUCTS FROM:

- North America • South America
- Asia • Russia • Africa • And beyond

FIND WHAT YOU NEED WITH PENROD.

Corporate Headquarters: Virginia Beach  
 PH (757) 498-0186 • FX (757) 498-1075

# Not just another pretty sliced veneer face.

## YOU'VE FOUND YOUR BEST SOURCE FOR SLICED VENEER FACES.

With a great selection of both sliced veneer and lumber from which to choose, St-Raymond Veneers has a tremendous inventory of domestic species—from cherry, maple and red oak to hickory, cedar and walnut—as well as more exotic species such as khaya and sapele, so you can enjoy the quality and convenience of immediate shipment on many products.

## SEE WHAT WE CAN DO FOR YOU.

# Get Hand-Selected Quality with SkyPly® Hardwood Plywood

MAKING LIVES BETTER  
FROM THE GROUND UP.

- Hand-selected hardwood veneers
- Offered in a range of species, veneer cuts, and matches
- Available on the most highly specified core options in North America such as Arreis®, Medex®, and Medite®
- SkyPly® panels are available with RediFinish - a UV coat that protects from surface scratches

Available with these standards and certifications:

- UL GREENGUARD certified
- CARB ULEF Exempt/TSCA Title VI compliant
- LEED® v4 credit support
- FSC® certified option FSC-C017580
- Sustainable Forestry Initiative® (SFI) program - certified available

Wine cellar features SkyPly® Hardwood Plywood in walnut with Medex® MDF shelves with walnut edge banding. To learn more about this project visit: [www.roseburg.com/inspirations](http://www.roseburg.com/inspirations)

# CUSTOM PANELS BUILT TO YOUR SPECIFICATIONS

The Inventors of  
**ApplePly®**

**Pick Your  
Substrate**

**Select Your  
Veneer**

**Choose Your  
Finish**

**Specify  
Machining**

States Industries invented ApplePly® and we do a whole lot more, too. With our unique capabilities in panel manufacturing, you can specify every detail of your custom hardwood plywood to create the perfect panel for your next project. Additional options include NOVA flat line finishing and component manufacturing.

**Specified by you. Built for you.**

## Warm Natural Beauty | Sustainably Sourced | Safe | Legal

The Decorative Hardwoods Association (DHA) began its second century in 2022. This directory of our members describes our diverse membership of North American hardwood plywood, engineered wood flooring, and hardwood veneer manufacturers and suppliers. Now is a great time to be a member of DHA. We are advertising decorative hardwoods directly to consumers and the design community and defending the definition of “real wood.” If you are not yet a member and your company manufactures, supplies, or distributes decorative hardwoods, learn more about [becoming a DHA member on our website](#) or contact DHA President, Keith Christman, at [kchristman@decorativehardwoods.org](mailto:kchristman@decorativehardwoods.org).

This 2024 edition of **Where to Buy** showcases all our members and their products, including their location and contact information. This award-winning directory makes it easy to specify and purchase American-made products, certified to American standards. These American engineered hardwood products are the natural, beautiful choice that you can trust.

Our 15,000-square-foot state-of-the-art testing facility and association office is located in Sterling, VA, next to the Dulles International Airport. Capital Testing and Certification Services, which offers technical services to our members and to non-members, continues to be the recognized expert in engineered hardwood products and other building and consumer products. Our lab provides a wide range of fire, physical property, and formaldehyde testing and certification.

### DECORATIVE HARDWOODS ASSOCIATION

### DHA PROFESSIONAL STAFF

Keith Christman, President

Eva Mentel, Office Manager

### CAPITAL TESTING PROFESSIONAL STAFF

Josh Hosen, Managing Director

Chris Palumbo, Senior Manager of Testing—Engineer

Chris Kaiser, Lab Tech II, Fire Testing—Engineer

James Fishenden, Lab Tech I, Emissions Testing

Patrick Dwyer, Lab Tech II, Physical Testing—Engineer

Victoria Gastrock, Lab Tech I, Fire Testing—Engineer

Our website continues to set new records for the number of visitors each year. The biweekly **eNews** reaches over 10,000 readers with diverse, pertinent news tailored for our industry and its customers. DHA sponsors three national consensus standards: hardwood plywood (ANSI/HPVA HP-1-2020), engineered wood flooring (ANSI/HPVA EF 2020), and the newly updated due diligence management system for sourcing legal timber (ANSI LTDD 2.0 2023). In 2023, DHA launched a new continuing education program for decorative hardwoods that has been completed by more than 2,300 architects and designers in the last six months. In addition, DHA believes in maintaining the integrity of products marketed as wood. We have successfully pursued challenges against the misleading marketing of fake products that claim to be wood but are just laminated paper or plastic.

If you are looking for natural, beautiful wood products that have stood the test of time—and [deliver climate benefits](#), you have come to the right place.

**Rocky Boucher**

Columbia Forest Products

**2023-2024 DHA Chairman of the Board**

### DHA is a member of the following organizations:

*American Forest & Paper Association*

*American Wood Council*

*American Hardwood Export Council*

*American Society of Testing & Materials*

*Real American Hardwood Coalition*

Experience  
custom  
hardwood  
plywood as  
unique as you

At Birchland, tradition meets innovation. We are a fifth-generation family business, carrying an 80-year legacy of knowledge and experience in producing hardwood plywood and veneer.

Our specialty lies in our extensive collection of over 100 natural and engineered veneers, all meticulously spliced in-house. Whether you're drawn to the timeless elegance of natural wood or the consistency of engineered veneers, we've got you covered.

We offer versatility like no other with thicknesses ranging from 1/8" to 2", and sizes up to 5'x 12'.

# CUT/MADE-TO-SIZE HARDWOOD PLYWOOD

**Hardwood plywood cut-to-size and made-to-size by the manufacturer is used for furniture, cabinet components, and specialty products.**

- Versatile – a variety of shapes and sizes available.
- Can be machined to meet customer needs.
- Eliminates the need to purchase and maintain expensive machinery.
- Reduces waste, inventory, and labor costs.
- Simplifies just-in-time sourcing.
- Customized product increases efficiency and yield.

# FACTS ABOUT DECORATIVE HARDWOOD VENEERS

## TYPES OF VENEER CUTS

Depending on the manner in which a log is cut, strikingly different visual effects can be achieved with the wood's grain and characteristics. This is the beauty of working with hardwood veneer - that two logs of the same species, cut in different ways, produce distinctive, individual veneers! Six principal methods of cutting veneer are used: rotary, quarter slicing, plain slicing, rift-cut, half-round slicing and lengthwise slicing.

### Rotary

Rotary veneer is produced by centering the log in a lathe and turning it against a broad cutting knife which is set into the log at a slight angle. Rotary cut veneer can be sufficiently wide to provide full sheet (one piece) faces.

### Quarter Slicing

Quarter sliced veneer achieves a straight grain appearance by slicing approximately perpendicular to the annual growth rings.

### Plain Slicing

Plain sliced veneer is veneer sliced parallel to the center of the log to achieve flat-cut veneer. The cathedrals are formed by the inner most growth rings as the veneer is cut through the flitch.

### Rift-Cut

Rift-cut veneer is produced from the various species of oak. Oak has medullary ray cells which radiate from the center of the log like the curved spokes of a wheel. This straight grain cut is at a slight angle to the medullary rays to minimize ray fleck (flake).

### Half-Round Slicing

Half-round slicing is cutting on an arch roughly parallel to the center of the log to achieve flat-cut veneer. The cathedrals can have more rounded tops since the grain is formed by the inner most growth rings as the veneer is cut through the flitch.

### Lengthwise Slicing

A board of flat sawn lumber is passed flat over a stationary knife. As it passes, a sheet of veneer is sliced from the bottom of the board. This produces a variegated figure.

## Figure Characteristics of Veneers

The figure of the face veneer is of the utmost importance to the designer and architect, because the whole character of the completed installation may be determined by the choice of veneer to be used. When discussing figure in wood, those who deal with veneer usually describe the characteristics of the "movement" in the wood - whether it has wide or narrow heart, cathedral, crossfire, or is highly figured. Some of the more commonly used veneers are illustrated below.

Cherry,  
American Black

Elm,  
Carpathian Burl

Maple,  
Hard

Oak,  
Rift-Cut

Walnut,  
Quartered

*Our thanks to Sieling and Jones, Inc. for the photographs of veneer.*

# ENGINEERED HARDWOOD FLOORING

- Easy to install and maintain.
- Economical solution for renovating areas or replacing existing flooring.
- Adds warmth and beauty to any room.
- Dimensionally stable.
- Tight tolerances for consistent fit.
- Engineered for strength and stability.

# Beautiful Antimicrobial Finish.

Timber Products' RhinoCoat™ antimicrobial prefinished panels are specifically formulated to mitigate the growth of certain microorganisms. Available in full fill, medium gloss or satin pre-finish, RhinoCoat can be applied to any of our veneer options, such as maple, birch, oak, walnut and more, with several core options to choose from.

# EXPERTS IN TESTING & CERTIFICATION SINCE 1954

Since 1954, Decorative Hardwoods Association members have consistently chosen Capital Testing as their preferred provider of testing and certification. Capital Testing is proud to certify these DHA members in 2024:

## CARB 93120 ATCM / EPA TSCA Title VI Formaldehyde Emissions

- AHF Products
- Birchland Plywood
- Cahaba Veneer and Plywood
- Chesterfield Wood Products
- Columbia Forest Products
- Commonwealth Plywood
- Darlington Veneer Co.
- Eastern Panel Manufacturing
- From The Forest
- GL Veneer Co.
- Goodman Veneer & Lumber Co.
- Great Lakes Veneer
- Howell Hardwood Flooring
- Lignin Holdings, LLC
- Manthei Wood Products
- Mohawk Industries
- Mullican Flooring
- Murphy Plywood
- Rockshield Engineered Wood Products
- Roseburg Forest Products (Riddle, OR)
- States Industries
- The Wood Gallery
- Timber Products
- Wisconsin Veneer & Plywood

## ANSI/HPVA HP-1 Decorative & Hardwood Plywood

- Murphy Plywood
- States Industries

## ANS LTDD: Legal Timber Due Diligence

- Danzer North America
- Veneer Technologies Inc.
- Atlantic Veneer Company, LLC

## ASTM E84 Flame Spread

- Murphy Plywood
- States Industries

To verify current certification status, visit our Product Certification Directory at [www.capitaltesting.org](http://www.capitaltesting.org).

## Sample Certification Marks

and more!

# HARDWOOD PLYWOOD STOCK PANELS

Hardwood plywood stock panels are manufactured in standard sizes such as 4' x 8' or 4' x 10' and are commonly 1/4" to 3/4" in thickness. Stock panels are available through distribution centers for industrial users or through mass merchandisers for commercial and do-it-yourself customers.

Frequently cut to component size by the end user.

- Consistent quality.
- Diverse selection of species.
- Strong and dimensionally stable.
- A variety of cores: veneer, MDF, particleboard, lumber, and combination core.
- Can be obtained finished.

Columbia Forest Products' hardwood plywood is featured in The Bay Area Discovery Museum. The plywood structures in this interactive play area are designed to imitate the wooded and rocky areas surrounding the Bay Area. Photo courtesy of Columbia Forest Products

# ROTARY HARDWOOD VENEERS

- The grain pattern varies from log to log, making each piece its own natural unique piece of art.
- Wide variety of species available.
- Maximizes the usable veneer taken from each tree.
- Ability to select a specific flitch or “look.”
- By using hardwood veneer, you honor centuries of craftsman heritage and contribute to an environmentally responsible use of a natural resource.

For more information, read: *Facts About Decorative Veneers* listed in the Table of Contents.

# RESOURCES

Looking for a copy of the national consensus standards for hardwood and decorative plywood or engineered wood flooring, or want comprehensive training for your team? DHA is committed to making it easier to do business with easy-to-download resources, many of which are free.

## AMERICAN NATIONAL STANDARD

### **American National Standard for Hardwood and Decorative Plywood, ANSI/HPVA HP-1-2020**

Requirements for face, back, and inner ply grades plus formaldehyde emissions, moisture content, tolerances, and more.

## AMERICAN NATIONAL STANDARD FOR ENGINEERED WOOD FLOORING

APPROVED AUGUST 14, 2020

### **American National Standard for Engineered Wood Flooring, ANSI/HPVA EF 2020**

Grade descriptions, test procedures, and requirements for veneer thickness, machining, moisture content, and finishing.

### **American National Standard for Due Diligence in Procuring/ Sourcing Legal Timber ANS LTDD 2.0 2023**

Guidelines for creating and managing a quality assurance program to exclude illegal timber from the supply chain.

### **Hardwood Plywood, Engineered Wood Flooring & Hardwood Veneer: The Basics**

An AIA-accredited introduction to hardwood plywood, engineered wood flooring, and hardwood veneer. Qualifies for one AIA LU/HSW hour.

### **Hardwood Plywood, Engineered Wood Flooring & Hardwood Veneer: The Specifics**

An AIA-accredited course on the types of hardwood plywood and veneer and how they are manufactured. Qualifies for one AIA LU elective hour.

### **Grading Workshop Sessions**

This comprehensive course on decorative hardwood plywood includes product construction, standards, species, grades, and much more.

# DECORATIVE HARDWOODS Association<sup>SM</sup>

## DHA MISSION

The mission of the Decorative Hardwoods Association, formerly known as the Hardwood Plywood & Veneer Association<sup>®</sup>, is to promote and support high quality, sustainably and legally produced decorative engineered wood products and hardwood veneer manufactured in North America.

## OUR CORE VALUES

- Our unique strength is our depth and breadth of technical expertise in engineered hardwoods
- Our marketing of North American-produced engineered hardwoods drives consumer preference
- The Decorative Hardwoods Association is the single voice of our industry, advocating for a fair market and level playing field
- We actively collaborate to promote the sustainable management of forest resources and access to legally sourced timber
- Our national consensus standards for hardwood plywood, engineered wood flooring, and due diligence for sourcing legal timber are recognized and specified by producers and consumers

To become a member, advertise with us, or buy publications, contact:

**703.435.2900**

[www.DecorativeHardwoods.org](http://www.DecorativeHardwoods.org)

# SPLICED HARDWOOD VENEERS

- Environmentally friendly.
- Made to standards agreed upon between buyer and seller – grade, craftsmanship, etc.
- Continuity from order to order.
- Cost control.

For more information, read *Facts About Decorative Veneers* listed in the Table of Contents.

**ARCLIN (M)**

Arclync is the new suite of high performance surfacing solutions provided by Arclin. One of the products under this brand is Crystal, a high performance dry finish application for hardwood plywood. It provides a clear finish solution that can be smooth or textured while providing high levels of scratch and wear resistance. This surface also performs as a moisture protection layer and protects the wood against surface stains while making it very easy to clean. Crystal also provides UV protection as part of the integrated solution. Arclin is the North American leader in treating technologies, surfacing solutions, resins and adhesives systems for plywood and other wood substrates. With 12 locations across North America we focus on providing great service to our domestic and international markets. Our strategically located technology application laboratories in both the West and East Coast bring us closer to the different markets. Arclin designs and engineers tailor-made solutions for each individual application. Arclin fosters partnerships focused on market growth by providing new market opportunities for our customers.

**FRANKLIN ADHESIVES & POLYMERS (M)**

For 75 years, Franklin Adhesives & Polymers has been the industry leader in bonding wood and wood products. Manufacturers in more than 60 countries trust Franklin’s products to provide them the productivity and quality they demand. Their customers know they can rely on their longstanding experience and deep commitment to the development of practical, hardworking solutions that meet real needs on the plant floor. Many of Franklin’s brands- Titebond, Multibond, and Advantage - have become renowned in the manufacture of wood products, in assembly, edging and facing, lamination, veneering, and finger jointing. The unmatched breadth of their adhesive product line offers Franklin’s customers the performance characteristics they seek. Whatever you might be running in your plant, call Franklin Adhesives & Polymers and see for yourself what makes them the most trusted adhesion company in the world.

**MEINAN MACHINERY WORKS, INC. (M)**

Meinan develops and manufactures innovative machinery for veneer and plywood production, holding hundreds of worldwide patents. The basic concept of peeling veneer was improved by the revolutionary Meinan lathe, using spiked disks to drive logs on their circumference, providing better veneer quality, higher yield, and extremely close thickness tolerance. The Meinan lathe is part of an automatic veneer peeling line with significant labor cost savings, featuring the world's first in-line green veneer composers to reduce labor costs and improve dryer utilization. Meinan's newest development is the 8' green veneer composer, installed in-line to automate the green chain. Meinan also manufactures scarf composers, grading systems, automatic layup lines, and sanders.

**PREMIERE FINISHING & COATING (M)**

Premiere Finishing & Coating has expanded its capabilities in a major way beyond its Flat Line floor finishing equipment with the installation of two new production lines. The new Makor reciprocating Spray Line / Oven combination can handle just about anything we throw at it - cabinets, cabinet parts, doors, frames, moldings, and anything that doesn't fit on the Flat Line. It is versatile and perfect for any 3D spray requirement, large or small. The UV Panel Line can finish clear, stained, opaque, and primed - we can match any color and finish. It has 6 roll coaters, a filler machine, Miltec UV lights, denibbers, and an in-line sealer sander. Now more than ever, if you can dream it, we can finish it.

**SPECIALTY ORGANICS, INC. (M)**

Specialty Organics is a diversified American chemical company. Our BreezeBond™ adhesive is the most-advanced plant-based single component adhesive available today. Going beyond existing plant-based adhesive technology, this product utilizes an abundant inorganic cross-linker. Not only is this product formaldehyde-free, BreezeBond™ also has no harmful petrochemicals. This good shelf-life product meets industry wet bond strength standards and is laboratory tested, zero VOC. This product is ideal for hardwood plywood and engineered flooring applications. It is price competitive with traditional hot-press adhesives on the market today and requires minimal capital investment to use product. BreezeBond™ is made in the USA and is not directly affected by volatile oil markets.

# Enabling Engineered Wood Products

## Innovative Solutions for the Engineered Wood Products Industry.

Hexion is a world leader in supplying resins, adhesives, wax emulsions, and ancillary products to the engineered wood and hardwood veneer products industries. We meet the most challenging applications with a complete package of innovative, cost-effective solutions. We're also at the forefront in developing environmentally suitable technologies for reduced emissions.

### *Product Lines*

- Urea Resins
- Melamine Resins
- Phenolic Resins
- Phenol-Resorcinol Resins
- PVA Adhesives –Conventional and Cross Link
- Casein Adhesive
- EcoBind™ Ultra-low Emitting Resin and Adhesive Technologies
- EPI Adhesive
- HRA Technology (Heat Rated Adhesives)

### *Applications*

- Veneer Splicing
- Composite
- Panels
- Hardwood Plywood
- Furniture
- Laminating
- Saturating
- All Woodworking Applications
- Fingerjointing – Structure and Non-structural Adhesives

Founded in 1921, Decorative Hardwoods Association represents the hardwood plywood, hardwood veneer, and engineered hardwood flooring industries. Together, we produce 90% of the hardwood plywood stock panels and hardwood veneer manufactured in North America.

## REAP THE BENEFITS OF MEMBERSHIP IN DHA

**ADVOCACY** Influence government actions and regulations that affect your company's bottom line. We work hard to ease the burden of regulations that undermine your ability to compete.

**STANDARDS** We lead, update, and publish consensus standards to help keep you at the top of your game.

**NETWORKING** Meet your buyers, distributors, and suppliers face-to-face at our annual conference.

**CONTINUING EDUCATION** Leverage our wide variety of resources, education, and standards—many of which are free—for your company and your team.

**REGULAR UPDATES** Twice per month, you'll receive the DHA email newsletter to help keep you current on the most important industry trends, opportunities, and developments.

**SUPPORT** Consult with DHA's experienced staff of technical experts, and enjoy discounts on best-in-class product testing and certification.

**MARKETING** Reach thousands of decision makers in the industry by advertising in DHA publications and email updates. Ads are restricted to members only.
